

THOMAS B. KROUSE GRAPHIC & WEB // DESIGNER & DIRECTOR
PRINT DESIGN : BRANDING : WEB DES&DEV : INTERACTIVE DES&DEV : ILLUSTRATION : 3D MODELING

Greetings,

I've been active in the graphic design field since the early 1990s, after graduating from Bowling Green State University in December 1989 and having spent the first several years of my career in Toledo. Then I worked in the Washington D.C. area since 1997, first for Quad/Graphics, the largest privately-owned printer in the western hemisphere, and then for various federal contractors. After relocating back to Toledo in 2015 and working at a local printer for a while, I'm considering a position once again in graphic design or communications.

During the 1990's, I worked for several Toledo design agencies. My skills and talents cover a wide spectrum of communications industries. I have developed projects from initial concept to final production. In each discipline, from printed matter to multimedia presentations, I was called upon to maintain the client's brand identity throughout its use in each project. My experience includes:

- Page design and layout, knowledge of 1 to 4 color printing processes
- WordPress and responsive website design, programming, administration
- Branding and visual identity design, from first concepts to final product and style guide documentation, including social media
- Concept illustration
- Digital video editing and 3D modeling, rendering, and animation
- Creative page layout and image manipulation
- Image compositing and manipulation

My online portfolio and downloadable PDFs are available at <http://thomasbkrouse.info>. I look forward to hearing from you. Thank you for your consideration.

Sincerely,

Thomas B. Krouse
